

Communications Solutions for Schools, Libraries, Universities & Institutions

Education solutions designed for your needs and priced for your budget.

Safety

Scalability

Affordable

Easy to Use GUI

911 Compliant

Kari's Law Compliant

Kari's Law requires that any Multi Line Telephone System (MLTS) will allow callers to reach emergency services via 911 without the need to dial a prefix for an outside number first. Most older systems don't allow for this change, all ClearlyIP solutions are compliant.

TRUNKING SERVICES

ClearlyIP Trunking Service aka "SIP trunking" (Session Initiated Protocol) utilizes your own internet bandwidth to route your calls.

UC PHONE SYSTEMS

ClearlyIP phone systems support all sizes of schools and institutions, with the possibility to grow built in.

IP PHONES

ClearlyIP offers different phones to fit the needs of a single classroom to a busy office.

SECURITY TOOLS

PANIC BUTTON

A single button that instantly dials multiple programmed numbers and plays a pre-recorded message to the recipients. The phone then goes into a broadcast-only mode, allowing the people on the receiving end to note the location of the call, and hear what is transpiring in the room.

SILENT INTERCOM

ClearlyIP has created Silent Intercom™ a system that allows school administrators to activate a classroom deskphone and enable the microphone remotely. The phone, if not on another call, will auto-answer and activate the microphone on the phone without indicating it's on an active call.
